Paperless into the future

Digitally create, sign and manage documents.

Thumbify

Digitize your processes

Thumbify is the easiest way to create digital forms and to archive and sustainably manage current paper documents and receipts.

Create receipts, contracts and handover certificates or use your own templates.

Every step is done efficiently and without media discontinuity.

Use the added value of digitization

Document using the media function and sign your forms directly on the smartphone. Share your documents as PDF with your contacts via email, messenger or cloud service.
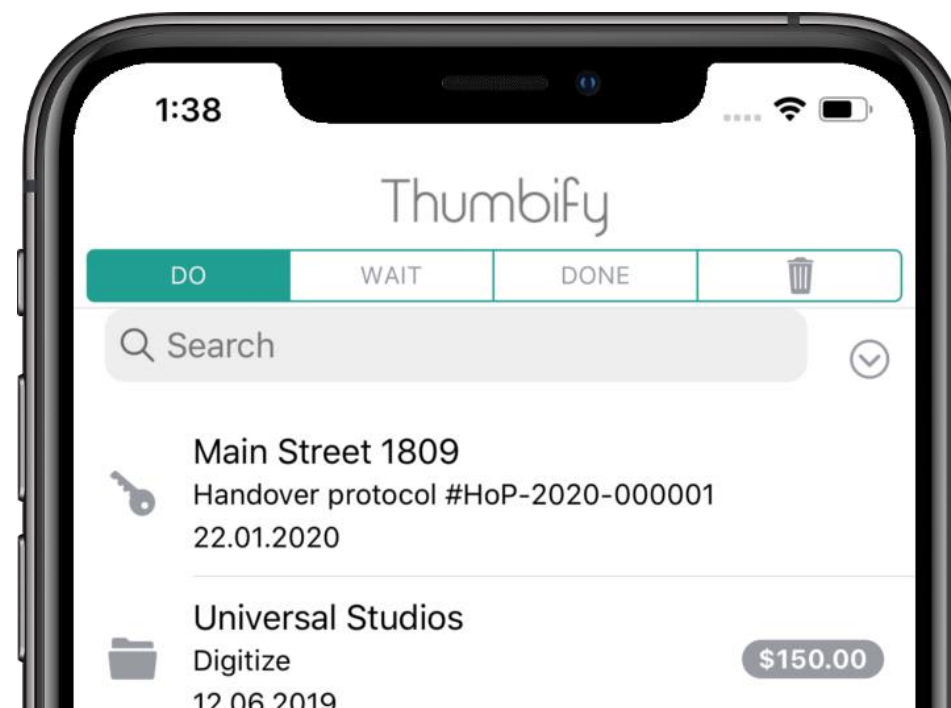

Thumbify helps you do all your business easily and paperlessly and is compatible with all platforms you use.

Focus on your core competencies

Keep track of your upcoming tasks with Thumbify. The categories *Do*, *Wait* and *Done* help you do this.

Start today with digital data capture and use this new basis to prepare your business for the future.
Individual solution required?

We make almost everything possible and are your right partner

for all challenges around the future topic of digitalization.

We support you in the initial potential analysis, the

implementation of your requirements and the securing of the

subsequent iterative improvement process.

We are curious about your requirements.
